# Don't risk using outdated pool treatment systems

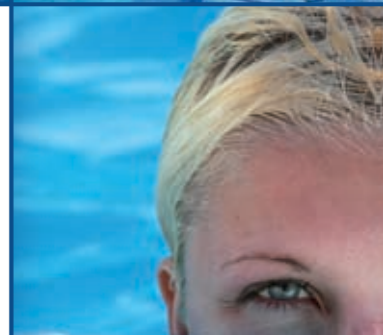

Don't let pool running costs sink your savings.

**ZERO Salt**  
 + 6% Silver  
 + 94% Copper  

---

**= 100% Chlorine Free**

I just love the Bioniser ... my wife and kids love the Bioniser ... my neighbours love the Bioniser ... I can't get the pool to myself anymore – it is fantastic!  
 M.C. Hervey Bay Qld

The water quality is amazing since we have switched from a salt pool to a "Bionised" pool. The Bioniser is saving us heaps and the kids won't get out of the pool.  
 J.S. Noosa Heads Qld

The pool is just as fresh as rain water since we installed the Bioniser system. It's so easy and only a tiny amount of chemicals are used now. There is no more dry skin from the salt we had before.  
 M.D. Federal NSW

I don't have to go near the pool since I installed the Bioniser – it just looks great. And I was away for two weeks.  
 G.K. Blakehurst NSW

I am very happy with the Bioniser. I am particularly happy the way it's cut down my workload.  
 A.T. Graceville Qld

Just a short note to tell you how thrilled I am with the performance of the Bioniser. As you may remember I installed one of your first units on my pool some 4 years ago. At that time I was working as a pool salesman for one of the prestige pool companies in Brisbane where I gained a lot of experience in the sales and the advantages of your product.

I had several reasons for installing a Bioniser - Firstly - I am not a great lover of swimming in a saltwater pool as I dont like the taste of the water and because in my 30 years in the swimming pool industry i know that there is the same level of chlorine in a saltwater pool as there is in a straight chlorine pool.

Secondly - I have 2 beautiful granddaughters who love to swim but are very susceptible to allergies - chlorine brings them out in a nasty rash.

I must admit that I was a little sceptical when you first introduced me to your product. I have to tell you that I and my family love the freshness and the clarity of the water in my pool. I am a very satisfied customer who wishes you and your product well in the future.  
 S.P. Burpengary Qld

## WHY A BIONISER IS SO MUCH BETTER THAN CHLORINE OR SALT IN YOUR POOL:

- Water just Brilliant to Swim in...Chlorine Free and Natural
- Fully Digital Technology. Globally Approved, Proven and Safe
- Non-Allergenic. Asthma and Eczema Friendly
- Kind to Skin, Eyes, Lungs and Costumes
- Set and Forget Operation... Automatic Control for your Pool
- Extends the Life of your Pool Blanket for Years
- No Dangerous "Other" Chemicals Required
- No Corrosion To Pool Equipment and Surrounds
- Really Easy to Install and Program Bioniser Monitors Itself
- Save Heaps on Costly Pool Chemicals and Pool Servicing
- Environmentally Superior to Any Other Pool System
- No Smelly Skin, Dry Hair or Red Eyes

# Chlorine & Salt Free Pool Water

## HOW IT WORKS...

<b>SILVER</b>	Nature's Antibiotic – kills over 640 pathogens and virus – fast. Potent Bactericide	<b>Vs</b>	<b>CHLORINE</b>	A Known Carcinogen – it is bio-accumulative and mutagenic. Low residual – Environmental risk.
<b>COPPER</b>	Nature's Algaecide – kills all algae including black spot. Also a bactericide		<b>SALT</b>	Becomes Chlorine Gas when passed through the electrodes on a salt chlorinator – See Chlorine and Stabiliser.
<b>Ag/Cu IONS</b>	Benign but Powerful – created by passing low DC current between the two silver and copper anodes – they purify the water and have a high residual.		<b>STABILISER</b>	Cyanuric Acid (Cyanide) – Extends the chlorine life in pools. Toxicity category 1. USA, EPA list. Illegal in indoor pool.
<b>HYDROGEN PEROXIDE</b>	Much Preferable to chlorine as a pool oxidiser. Low toxicity – high residual.		<b>TRIALO-METHANES</b>	Cancer Causing Substance – Formed when chlorine and organic matter (leaves etc.) interact.

Swimming in fresh clear water should be every pool owner's joy. The Bioniser pool purifier will deliver you an algae free and pure pool day in day out with the bare minimum of effort and expense.

Like all good clean technology – the more simple the operating system, the more effective it is.

The Bioniser pool and spa purifying system works by passing a safe, low, DC electrical current between two Copper and Silver anodes (electrodes). This creates an abundance of natural mineral ions that are swept into the pool or spa where they remain on patrol guarding your pool and spa water from impurities.

No stabilizer is required (unlike chlorine) as these natural ions will remain in the water for weeks - even if your Bioniser was switched off. The mineral ions produced are unaffected by high water temperature (unlike chlorine) and prefer a pH range between 7.0 and 7.4 (as does chlorine). They do not ruin bathing suits, dry out hair and skin or leave an unpleasant odour on your person after swimming. Nobody wants that!

An oxidizer (hydrogen peroxide, potassium monopersulphate or chlorine) will be required from time to time to polish the water free of oils like suntan lotion, hair oils, perspiration etc.

The Bioniser Mineral Anodes are approved for use in Australia by the APVMA. The Bioniser is approved for use anywhere in the World.

In the USA many public pools employ ionization as the primary method of sanitation with over 97% of swimmers expressing much higher levels of satisfaction and enjoyment with this method over the traditional chemically controlled pools.

Bioniser anodes are sacrificial and will require replacing. The anode change-over process is quick and easy. The average size pool (50,000 litres) will change anodes about every two years with normal use and at a cost of

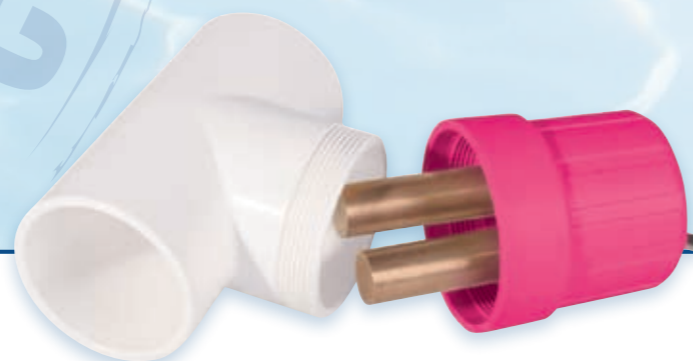

around \$2 per week. Do the math! You will know when to change anodes as the Bioniser tells you it's time.

The Bioniser owner need only perform three simple tests per week and three tests every three months to enjoy a consistent level of pool/spa water quality that has, until now, been unachievable without moderate to high chemical use and expense.

Do these tests and use the "boost" feature on the Bioniser when the water is under environmental stress - ie. heavy rain/wind - and we will virtually guarantee you a trouble free pool or spa. These three tests every week will take about 5 minutes. Now how is that for confidence!

Power usage is negligible. The Bioniser has two timers one for the pool pump and one for the ionizer. It is an automatic set-and-forget system. A software program controls the unit and it is very simple to set up. Just choose the filtering times/cycle and set the ionizing period. That's it. Turn it to Auto and the Bioniser will do the rest.

Now you can rest easy knowing you have the best pool and spa system available today. You will be taking care of four things: The Planet, Your Family's Health, Your Pocketbook and Your Peace of Mind.
